

Master of Engineering

Applied Computational Mechanics

Information sheet for non-EU students

The master's degree course is a **part-time course** with few and blocked times of presence. You are absolutely required to work or do an internship in a company while participating in the course.

While attending the course you will **not** get **matriculated** at the universities. Consequently, you will not get benefits like health insurance for students or student visa. Of course you will be able to use all facilities of the involved universities that are important for your studies.

In order to take part in the course you have to conclude an **agreement under private law** with Landshut University of Applied Sciences and Ingolstadt University of Applied Sciences. This will ensure your rights regarding all aspects of study.

Tuition fees have to be paid in four instalments, callable respectively at the beginning of every semester.

The course takes **four semesters (two years)**. It begins in the middle of September and ends two years later, at the end of September. The exact dates / schedules will be announced twelve weeks before the beginning of the semester.

Examinations will be held during the course and during the above named times of presences.

Places of study are Landshut University of Applied Sciences and Ingolstadt University of Applied Sciences. Please consult the above table (times of presence) for the respective location.

Hochschule Landshut

University of Applied Sciences
Am Lurzenhof 1
84036 Landshut
www.fh-landshut.de

Hochschule Ingolstadt

University of Applied Sciences
Esplanade 10
85019 Ingolstadt
www.fh-ingolstadt.de

Accommodation for your stay during times of presence has to be booked by yourself. If necessary, we will gladly provide you with a list of hotels.

The course is **completely taught in English**. The necessary knowledge of the English language will be tested during the application process. Knowledge of the German language is not required for attending the master course. However, some basic knowledge for every day live is recommended.
