

## Master of Engineering

# Applied Computational Mechanics

## Information Sheet: Tuition fees

### Conditions of payment

Attendance in the postgraduate master's degree course in Applied Computational Mechanics requires the payment of tuition fees which includes all costs for lectures, labs, and examinations, use of the library, software and scripts.

Tuition fees will be invoiced before the beginning of the respective semester as following:

- \* 5,000 EUR in August of the first year
- \* 5,000 EUR in February of the second year
- \* 5,000 EUR in August of the second year
- \* 5,000 EUR in February of the third year

However, there is also the possibility to pay the whole sum before the beginning of the course of study. If prepayment is made, a 5 percent discount will be allowed.

In case of a complete or partial assumption of tuition fees by the student's employer we provide the option to invoice the company directly. If so desired, the Third Party Billing form must be submitted to us by August.

Expenses for traveling and accommodation must also be considered.

### Representative examples

CADFEM GmbH: Payment of 75 percent of tuition fees – 25 percent are paid by the employee (charging with the annual staff bonus); Employee is in charge for traveling costs

Company 2: Payment of 100 percent of tuition fees, traveling cost and accommodation

Company 3: Payment of 50 percent of tuition fees (first and fourth installment); Employee is in charge for remaining costs

Examples show that grants are individually arranged between the companies and students. A possible time offset should also be considered. For more information on the schedule kindly take note to the information sheet on duration.
